TEMPO

Our time, or rather our speed within time, constantly seeking harmony with the heartbeat and becoming a powerful form of expression.

A geographical point or a state of mind, something distant and unfamiliar, yet capable of becoming a starting point for imagination.

NORDICO

TIMING

More than just placing sounds in time — it's the art of knowing when to take the next step.

The dynamic between innate talent and environmental influence, but also of a country's landscape and spirit.

NATURE AND NURTURE
